Conservation of native species and sustainable use of pastures

Paolo Stefanini - Farmer, Cascina Stef - Agriturismo Malga Magnolta

Aperitif with local products

UNIVERSITÀ
DEGLI STUDI
DI MILANO

Free event,
subscription needed

In the framework of the Climbing for Climate event, UNIMONT - detachment of the University of Milan located in Edolo - a small mountain municipality in the heart of the Italian Alps, organises an initiative dedicated to the protection of agrobiodiversity in relation to climate change in the mountains.

Taking advantage of the framework of collaboration of the National Technical Scientific Table TTS (Tavolo Tecnico Scientifico Nazionale per la Montagna), set up last June by the Hon. Mariastella Gelmini, Minister for Regional Affairs and Autonomies with responsibility for the development of mountain areas, 7 TTS universities were mobilised to promote a joint action of national scope on the occasion of the third edition of Climbing for Climate.
